PROFESSIONAL SUMMARY

First-year Master's student in Information Systems Security at USTHB. Passionate about cybersecurity, software development, and artificial intelligence, I am actively involved in both advanced academic research and freelance projects, specializing in designing high-performance and secure full-stack web solutions.

TECHNICAL SKILLS

- **Languages:** Python, PHP, JavaScript, Java, C, SQL
- **Web Front-end:** HTML5, CSS3, Bootstrap
- **Web Back-end:** Laravel, Django, PyQt
- **Databases:** MySQL, PostgreSQL, SQLite
- **Security:** RSA / AES, Wireshark, Nmap, Kali Linux, GNS3
- **Systems:** Linux (Ubuntu, Kali), Windows, Windows Server, VMware
- **DevOps Tools:** Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

Web Developer — Micro Club USTHB | *October 2024 – February 2026*

- Developing internal web projects for the university student community.
- Contributing to AI and innovation-focused events.

Community Manager — Micro Club USTHB | *October 2024 – October 2025*

- Creating and publishing LinkedIn content to promote club activities and tech initiatives.
- Providing digital coverage for AI-related events.
- Driving growth in social media visibility and engagement.

Freelance Web Developer | *July 2023 – Present*

- Designing and delivering end-to-end full-stack projects for diverse clients.
- Developing web applications using Laravel, Django, and PyQt.

PROJECTS

SecureCloud — Encrypted Cloud Storage

- Developed a cloud storage platform featuring end-to-end hybrid encryption.
- Implemented RSA-2048 for secure key exchange and AES-256 for data encryption.

Automated DevSecOps Watchtower & Supply-Chain Security Platform

- Developed a proactive security monitoring solution designed to secure CI/CD pipelines and manage risks associated with software supply chains. The tool automates the detection of vulnerabilities across development environments, including Docker, Kubernetes, and GitHub Actions.

Hidden Process — Academic Rootkit (Linux & Windows) (C, Python, Linux Kernel, Windows API)

- Researched and implemented stealth processes: Linux syscall hooking and Windows registry/service manipulation.

HR Management — Desktop Application (PFE)

Developed a comprehensive Human Resources management system for tracking employees and administrative workflows.

Mini Compiler (C, Algorithms, Language Theory)

- Designed a full compiler from scratch, including lexical analysis, syntax analysis, and intermediate code generation.

EDUCATION

Master's in Information Systems Security | *USTHB* (Oct 2025 – June 2027)

Bachelor's in Computer Systems & Software Engineering | *USTHB* (Sept 2022 – 2025)

High School Diploma (Baccalauréat) – Mathematics | *Tamaris* (2022)

- Graduated with High Honors (Mention Très Bien) – Grade: 16.47/20.

CERTIFICATIONS

- **AI Tools Certificate** | ALX (2023)
- **Bachelor's Degree in Software Engineering** | USTHB (2025)
- **Master's in Cybersecurity (Ongoing)** | USTHB (2025 – 2027)

LANGUAGES

- **Arabic:** Native
- **French:** Fluent
- **English:** Fluent
